In the Fourth Edition of Affordable Paradise you'll learn the secrets to an affordable life in Hawaii! Discover how to find affordable homes and then how to evaluate a purchase and how this works differently in Hawaii. You'll get to know the tricks for keeping everyday expenses down, shipping possessions to Hawaii at minimum cost, all about Hawaii's schools and integrating your kids into this new culture, info on medical facilities, bringing your pets with you, and much more.

A "Virtual Tour" stops in each community and makes note of weather, living conditions, types and costs of available housing and any details that might invite special attention.

There's a whole chapter on the reasons why Hawaii is clearly NOT everyone's paradise, too. We aim to share the information we've observed among those who put so much effort, emotion, money and time into their "move to paradise," only to discover within a short period of time that there is more to island life than one would find during a short vacation on Waikiki Beach.

The goal of Affordable Paradise is not so much a call to move to Hawaii as it is a plea to those who are thinking about it to do so with heart and soul; to enter into this huge decision with an open mind, knowing in advance the ups and downs of others who have come and gone before them.

The focus of Affordable Paradise is discovering the awesome Island of Hawaii, the “Big Island.” Folks have asked why the book doesn’t cover affordable living on the other islands, like Maui or Oahu. For the same reason that a book on affordable living in California would not presume to include Beverly Hills or San Francisco. The Big Island is truly awesome, still affordable, and there has never been a better time than now! The Big Island is truly big; All of the other islands would fit on the Big Island with room to spare. The population of the entire island is less than a quarter of the population of just the city of Honolulu! The versatility and opportunities here are boundless!

The Fourth Edition addresses the changes brought on by the recent economic climate of the country, and is fully current with 2011 real estate values.
