In 1093, when most women live and die without ever seeing a book, Edith is the exception. As the daughter of King Malcolm of Scotland, she has always been expected to achieve great things, and so she was sent to England to receive an education at just seven years old. Now, at fourteen, her aunt wants her to take vows to become a nun. A knight hospitaller wants her to join the fight against the Saracens in the Holy Land. And, her father wants her to marry a man she does not love just for the money and political benefits.

But... perhaps she might become queen of England instead? After all, she is rumored to be the only woman to have ever turned the king of England's head. And anyway, King William is far kinder and prettier than the man her father chose for her.

As dawn breaks, she runs away from the abbey without any solid plan. And just as she takes a deep breath and allows her legs to rest, she is found by the king's

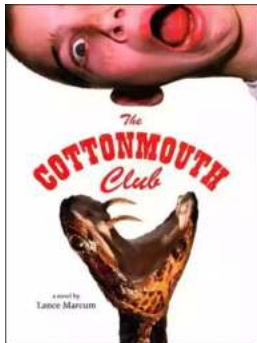

little brother, Lord Henry. He won't let her travel alone. When she protests his company, he forces her in his horse's saddle and rides away with her into the forest.
